George Troutman of Hopewell was in Bedford on Saturday to advertise a stolen horse and buggy, but while here they were found in an alley where they had been left by the guilty party.

Marriage licenses were issued in Cumberland during the past week to the following: Marshall F. Amick, of Everett, and Eva Pearl Lowry, of Ellerslie, Md.; Benjamin J. Leydig, of Hyndman and Mabel V. Dickhoff, of Hyndman and Kenneth Claud Burkett and Edna Stiffler, of Clysburg.

### OPERETTA AT ASSEMBLY HALL

Assembly Hall last Friday evening was the scene of a motley crowd of characters, when the four upper grades gave their charming little operetta, "The Land of Fairy Tale". Rea Longenecker was a splendid "Simple Simon" and as he introduced the Fairy Tale characters, each one was greeted with a round of applause. This band was followed by the children of the earth who came to see for themselves whether or not their Fairy Tale friends were alive. No professional players could have played the role of "Betty" and "Bob" more pleasantly than did Charlotte Brightbill and Bobby Enfield. Then followed the parents whom Father Time brought in his huge airship. The dance of Father Time, the clock, and the hour glass scored a big hit.

Hundreds of "ahs" greeted the first sight of Peggy Hulse as Queen Titania with her chorus of fairies, and Almina Cessna as Queen of the night with her chorus of fireflies. Both of these choruses made a big hit perhaps because they were the most spectacular due to the lighting effects and their gaily bedecked dresses. Santa Claus with his seven prancing reindeer also brought a lot of applause.

The court of justice with Father Time as Judge and the Boy Scouts as jury furnished interesting part to the play. The keen wit of Blue Beard Simple Simon, Peter Pumpkin, Biter and Jack and the Bean Stalk made everybody laugh. Perhaps the funniest character of all was the Boogymen in the person of Fred Snyder.

Anna Elizabeth Cessna made a charming little Bo-Peep, and credit must also be given to Mother Goose whose acting was splendid. It would be hard to say which part pleased the most but each part showed the results of the long rehearsals which had been held for several weeks past. There was not the slightest sign of stage fright in any of the players. They seemed to enter thoroughly into the spirit of the play in which they were cast. In their lines they were letter perfect, and great credit is due the teachers and principals for their efforts.

### Baseball in Bedford

The organization of the Bedford Baseball club is now under full swing. It is expected the team will be better in many respects than before the war, as there will be no drinking of intoxicants by the players on the diamond as in days gone by. The new rule which has been adopted in which all players on both sides are to adhere to the decisions of the umpire will be enforced to the letter so long as it proves popular. If the players and the public decide later that they do not like this new rule, the old method of each player rendering his own decisions will be resorted to. Bert Benson, pitcher is expected to enter the season in better form than ever before, as his arm had a long rest. George Gimble, noted catcher should do much better work behind the bat as his whiskers are much longer than in pre-war times and will furnish him much more protection from the long swings of bats and tipped balls. The first game will start out with the Rocky Ford School Teacher as umpire.

### DEATH OF FORMER RAINSBURG LADY

Mrs. Mary Alice Morgart died at Wayne, Indiana, April 22nd, from blood poison caused by infection from a small scratch just one week previous. She was the daughter of Mr. and Mrs. Joseph Shoemaker and was born on the Old Shoemaker Homestead now owned by her brothers, Henry and John, two miles North of Rainsburg March 27, 1856. October 2nd, 1881 she was united in marriage to Charles A. Morgart, who died in 1888.

Since her husband's death she has made her home at Rainsburg with her mother until the latter's death two years ago when she moved to Fort Wayne to live with her daughter Mrs. G. H. McChintie.

Funeral services were held at her home April 26, conducted by her pastor, Rev. Hostetter of the Third Presbyterian Church. She was from girlhood a member of the Reformed Church at Rainsburg, but transferred her membership to the Presbyterian Church at Fort Wayne about one year ago.

Surviving she leaves four brothers, Henry, and John of near Rainsburg, William of Bedford and Simon of Pittsburgh, two sisters, Mrs. John Koontz of near Rainsburg and Mrs. Laura Diehl of Youngwood, and four grand children, John, James, Billy and Margaret McChintie of Fort Wayne. Her only child, Mrs. G. H. McChintie preceded her in death about one year ago.

### JACOB C. SMITH

Another of Bedford County's sons of the pioneer days, the fourth in ten days, Jacob C. Smith, has passed to the great beyond. Veteran Smith was born near Napier on February 22, 1839, died April 30 being in his 82nd year. He was a son of Jacob and Barbara (Debaugh) Smith, both deceased. At the age of 22 he volunteered for service during the Civil War and was enrolled in the fall of 1861 at Philadelphia as a private in Co. E, 2nd Pennsylvania Cavalry and 2nd Brigade, 2nd Division A. C. and was a duty Sergeant. In 1863 he was honorably discharged at Bilton Station, Virginia and immediately re-enlisted as a veteran in same command. He took part in the battles of Bull Run, Cedar Mt., Gettysburg, Petersburg, Ashby Gap, Richmond and Bilton Station. When the war was over, he was honorably discharged at Philadelphia.

He was twice married, his first wife being a Miss Riseling. After her death he married Mary A. Hoffman (nee Otto) who survives. He is also survived by the following children: Ella Adams, Fairmont, W. Va.; Jennie McKinzie, Ridgely, W. Va.; Sheridan, of Independence, W. Va. and John C. of Saxton.

Mr. Smith was an honest, industrious, honorable citizen, loved by his family and respected by all who knew him and a member of the Reformed church. Funeral services were held from his late home in Napier Twp. on Monday at 10 A. M. Rev. Eyer, of Bedford, officiating. Interment was made in the Schellsburg cemetery.

### GEORGE F. ZIMMERS

George F. Zimmers died of heart failure on May 1, 1920 aged 65 years, 10 months and 12 days. Mr. Zimmers was stricken at the barn on the farm where he was always resided and where he died. He was a son of George and Elizabeth (Petter) Zimmers and was married to Miss Mary Snively, daughter of David Snively, deceased. He is survived by his wife and a son Harry C. who with his family reside at home. Also a brother, Wayne and a sister, Mrs. Peter C. Russell of Bedford Rt. 5.

He was a life-long member of the Messiah Lutheran church, being at one time church organist and until his death a member of the choir. He filled many church offices, being sexton at the time of his death. Funeral services were conducted on Tuesday morning by Rev. G. H. Middleworth at Messiah. The high esteem in which he was held was shown by his funeral which was the largest ever held in this church.

His sunny disposition won him friends everywhere. He will be missed in the home church and community. Pall bearers were: Frank Russell, Charles Ickes, J. C. Roberts, Charles D. Herschberger, Harry B. and A. E. Smith.

The Republican keepers have done nothing to remove the Newberry "white elephant" from their menagerie.

## NORTH CAROLINA IS FOR WOMAN SUFFRAGE

Democratic State Convention Asks Legislature to Ratify Federal Amendment.

Ratification of the Federal suffrage amendment to the Constitution by the North Carolina Legislature is assured by the action of the Democratic State convention at Raleigh, which placed a plank in its platform at its recent convention at Raleigh endorsing suffrage, and calling upon the legislature to ratify.

Action by the convention followed a statement by Senator F. M. Simmons, one of the party's leaders in the State, and Representative Clyde R. Hoey, of the Ninth Congressional district, temporary chairman of the convention, who advocated ratification.

Governor T. W. Bickett, has also come out for suffrage and predicts ratification by the legislature, which will meet in special session late in June or early in July.

Ratification by North Carolina insures the adoption of the amendment in time for women to vote in the November election, as thirty-five States have already ratified. If no other State acts favorably prior to the convening of the North Carolina Legislature, the honor of being the thirty-sixth and last State whose favorable action is necessary to extend the voting privilege to the women by the Federal Constitutional amendment will fall to a rock-ribbed Democratic State of the so-called "solid South" and the Democratic party, which is in complete control in that State, will be responsible for women voting this year, for which the women of the whole country will ever be grateful.

### AMERICANISM VS. VULGARITY

Being a traveling man, I am faced each day with a growing opposition to the onward march of Americanism. Our young men who are expected to step into their fathers' places and drive the wheels of industry to a higher and noble aim and make America the bright and shining star of the world are losing all their prestige and ambition and falling into a lower sphere of activities.

'Tis sad to see young men behind counters in restaurants with white aprons on filling positions with cigarettes in mouth and steering an auto truck while the atmosphere is blue with brimstone smoke a vapor arising from their profane language. Why cry about the High cost of Living when it all comes from our indolent and shiftless young men of today. You will find them the biggest part of the time in pool halls instead of creating wealth.

Our young men of today are not nearly so bright as the young men of 20 years ago, and for principles and morals they date back one century. It is staggering for a man to contrast and as I do not profess to be a poet I am driven to picture the results of the future in a poetical way and hope not to be censured for my good English mistakes.

### AUTOISTS NARROWLY ESCAPES DEATH.

During a recent storm, the roof of a tree opposite the residence of R. A. Long between Bard and Buffalo Mills was struck by lightning, the lightning running from the roof into a high slate bank tearing the slate and earth out with such force as to smash the top of a passing car. The occupants of the car were Walter Dunlap, wife and two small children one aged three months and the other three years, and James Dunlap, aged fourteen, a brother of Mr. Dunlap. They were enroute from Cumberland Md. to Fredens, Pa. Besides cuts about the face injuring the sight of one eye, Mr. Dunlap sustained about a dozen other gashes. James received a severe cut on the back of his head a piece of the slate hitting him and Mrs. Dunlap and the children escaped without a scratch.

Mr. Long was in his barn feeding when the crash came. Knowing that the lightning had struck close, he ran out of the barn and seeing the auto smashed went to the assistance of the occupants, fearing to see some one killed while pinned down by the top laden with gravel and dirt. The crew of a passing freight train, seeing the accident, stopped and helped Mr. Long clear away the debris and rescue the occupants, who were then taken to the Long home and made as comfortable as possible until 6:20 when they took the train for Cumberland where they received medical attention. Mr. C. C. Dunlap of Fredens, conductor on a passenger train to Somerset, father of Walter Dunlap, was notified of the accident and met his son at Cumberland.

The car was taken to Cumberland for repairs. Mr. Dunlap thinks the damage to the car will amount to about five hundred dollars, but was glad enough that every one escaped death.

## McADOO TELLS FARMERS WHERE HE WOULD STAND

ANSWERS QUESTIONNAIRE AS PRIVATE CITIZEN WITH OPINIONS

Replying as a "private citizen" to the questionnaire issued to all candidates for presidential nominations by the national board of farm organizations, former Secretary McAdoo tonight outlined his position on various propositions being agitated in the pre-convention campaign.

Present tax laws, Mr. McAdoo declared should be simplified and the burden of taxation re-distributed so that the men who earn their incomes by the sweat of their brows and with their brains shall be required to pay as heavy taxes as those who live in idleness and draw incomes from safe investments. He declared himself opposed to all tax free bonds.

If, after a two year period of private ownership, the railroads failed to function properly, Mr. McAdoo said, he would favor re-opening the railroad question. He declared for a "fair trial" of the new railroad law, but declared it "cannot settle the railroad problem because it does not reach fundamentals."

Mr. McAdoo declared himself for broader publicity for operations of the farm loan system; for means to bring producers and consumers closer; for representation of agriculture on boards and commissions "when consistent with public welfare." for a secretary of agriculture who "understands actual farm conditions;" for reduction of farm tenantry; for the same service and supplies for farmers' organizations in interstate commerce as apply to private enterprises in the same circumstances; for regulation of monopolistic control of corporations in interstate commerce and as "absolutely opposed to any abridgement of the right of free speech, free press or free assembly."

## MCCABE AND BYER MARRIED TRIP TO OKLAHOMA

POPULAR YOUNG COUPLE WERE GIVEN A FITTING SEND-OFF BY THEIR FRIENDS DINNER AT PENN CLUB

A very pretty wedding was solemnized Saturday morning at Holy Rosary Church when Miss Genevieve Byers of Johnsbury was united in marriage to Dr. Samuel T. McCabe of that place.

Miss Byers looked very beautiful in a dark blue and tan tulle suit and large picture hat of dark blue. She wore a corsage bouquet of yellow roses.

Dr. McCabe was attended by Dr. Thos D. Hanlan of Philadelphia.

A sumptuous wedding breakfast was served at the Penn Club. The tables were a veritable garden of roses, tulips and sweet peas.

The wedding party consisted of the following: Dr. Thos D. Hanlan, Dr. Fredericks, Jack Fortner, James Morris and Henry Moran, of Philadelphia; Rev. Geo. Donovan, of Huntington; Dr. M. Depta, Herb Gutekuntz, Dr. John Donovan, and Dr. Horowitz, of Pittsburgh; Dr. J. G. Flynn of Ridgway; Genevieve Ryan and Amanda Brown of DuBois; Dr. and Mrs. M. Leary of Ridgway; Rev. A. H. Wiersbinski, Dr. W. R. Palmer Mrs. Morgan Knudson, Sarah Thielach, Margaret Geary, Winifred Divany Mrs. Nord, Anders, Dr. and Mrs. Harvey Roberts, Kathleen Grumley and Lucile Cadigan, of Johnsbury John Geary, of Salamanca, an uncle of the bride.

Dr. and Mrs. McCabe left on the B. R. P. train No. 3 for Bartlettville Oklahoma, where they will be the guests of Mrs. McCabe's sister.

Miss Byers is a young lady of most charming and winsome disposition. She has made her home in Johnsbury for the past six years during which time she has deeply impressed her stability of character and personality on the many friends she has won.

Dr. McCabe was a former teacher on Broad Top and was a most successful boy in any undertaking. He closed his teaching career to enter the study of medicine. His father is Mr. Thomas McCabe of Defiance The Gazette extends its hearty congratulations and very best wishes for the young couple's prosperity.

The best indication of Spring fever is when you see a fellow in the month of May who desires to do nothing that some one else can possibly be persuaded to do for him. The best known treatment for the disease is to let it drag along until a cold snap in the Fall.

## GOMPERS INDICTS CONGRESS

Labor Will Resist Return of Those Who are Shown False to Trust

PREDATORY WEALTH STIRRING UP WARS

Sweeping charges that the present congress has failed the nation "with completeness and abandon" are made by Samuel Gompers, president of the American Federation of Labor in the current issue of the American Federationists.

"America must get rid of its veto congress and elect an action congress," he says. "The 'no' congress must give place to a 'yes' congress." The labor leader asserts that congress has failed on the peace treaty in reconstruction and the high cost of living and that it also has failed us intelligent comprehension of every great question affecting the lives and welfare of our people.

The "sins of the present congress," he adds were of commission as well as omission, as there had been "almost an eagerness to do the wrong things," the enactment of the railroad bill being cited as a "shining example."

"There must be a congress which will turn its face to the task confronting the American citizenship in the true spirit of American institutions," Mr. Gompers says. "A constant genius for accomplishment must replace all ill-considered mania for restriction and coercion."

"America cannot play forever the part of a peevish child in international relations. The affairs of the world are the concern of the United States. There may be proper limits to which this concern may go, but there is no longer any such thing as absolute divorce from what transpires elsewhere."

"The blind and bigoted action of congress in refusing to deal intelligently with the peace treaty has made it impossible for the United States to manifest the proper concern in these affairs."

Propaganda for War.

"On our own continent there is the same need. For weeks a senatorial committee has been going up and down the country gathering testimony, the evident purpose of which can be but to inflame the minds of those who think little and who take much on faith. At periods all too frequent the United States is brought to the verge of war with Mexico. It is not difficult to see the evidences of satisfaction on the part of predatory interests at each of these periods, nor is it difficult to discern the propaganda which fosters the development of them."

"Falsehood, vilification, studied misrepresentation—these are the weapons constantly in use by those who, to serve their own ends, would precipitate war between these two American republics. It is no longer possible to feel with certainty that high government officials have not been made the tools and pawns of those who seek intervention, the latest term for which is "Cubanization."

"Democracy must mean equality of opportunity. It must mean the sovereignty of the masses. It must mean absence of domination by a select ruling class or caste or clique."

"Congress has done much in recent months to indicate hostility to these principles. Powerful forces in the United States are seeking to wound and cripple democracy. They don't want equality of opportunity. They want an unfair advantage in the industry of the nation, in the legislatures of the nation and in the courts of the nation."

"When the labor movement protests against the pressure of those who would turn backward the tide of progress and deny the sunlight to lives just emerging from the dark it speaks with authority."

"The labor movement of America does speak and it must be heard. Where the effort is made in industry to crowd men and women backward and downward, we will resist and resist and resist, for it is better to resist and lose than never to have resisted. Where the effort is made in the halls of congress and legislatures we will resist and resist and resist."

"We will resist with all our power the re-election of those who have been false to the trust which humanity placed in them."

## BIBLE CONFERENCE AT LAKEMONT

WILL BE HELD AT LAKEMONT PARK FROM JULY 31st TO AUGUST 8th.

Some months ago, Referee Jacob Snyder of the state compensation department, while in attendance on the Bible conference conducted at Mountain Lake, Maryland, by the Moody Bible institute, conceived the idea of a similar conference for central Pennsylvania. After thinking the matter over carefully, Rev. Snyder conferred with Mr. Craine of the Logan Valley Traction Company relative to the possibility of holding such a conference at Lakemont park, receiving very definite encouragement from that gentleman.

Later the matter was discussed informally with leaders in Bible conference work in this section, with the result that a meeting of interested men was held at the P. R. R. Y. M. C. A. on Monday afternoon to consider the advisability of holding such a conference. About thirty representative men were in attendance and after fullest discussion, unanimously decided to arrange for such a conference in the casino at Lakemont Park for nine days beginning Saturday, July 31, and closing on Sunday August 8th.

An organization was then effected with the following officers and committee chairman:

President, Rev. George W. Price; vice presidents, Rev. Jacob Snyder, and H. J. Aukerman; secretary W. E. Sneath; treasurer, John Dillen. A committee on time and place, consisting of Rev. Jacob Snyder, Rev. Chas. F. Reitz, and F. F. Kleffman was appointed, who, in conference with the officials of the Logan Valley company yesterday, arranged for the holding of the conference on the above named dates.

The committee on program, consisting of Rev. George W. Price, Rev. Jacob Snyder, H. J. Aukerman; W. E. Sneath and A. G. Dougherty, was also appointed. This committee have in mind the securing of some of the ablest Bible teachers in this country for the conference, and are already in correspondence with some of them.

Other committee chairmen were chosen, who, with the executive officers, will constitute the executive committee of the conference and will select the personnel of the following committees which will be announced later: Finance, S. W. Mobus; publicity, W. D. Calvert; music, William Reese; entertainment, Walter Kelly. The finance committee was instructed to arrange for the underwriting of the expenses of the conference and to receive voluntary offerings during the sessions of the conference. The committee on entertainment will arrange for hotel accommodations for the speakers and will also arrange for out-of-town people who care to arrange to spend the entire time of the conference in private homes near the park provided such are opened.

It is the plan of the committee to seek to interest the members of all Christian churches, irrespective of denomination, in the conference, and to make it contribute in the largest possible way to the spiritual uplifting and blessing of the entire central section of Pennsylvania and with this end in view the executive committee will select a strong active man for vice president in each of the counties in the center of the state, through whom they will work in endeavoring to secure the largest possible attendance.

Those in charge of the conference plans believe that Lakemont Park may come to be a great Bible conference center similar to Eagles Mere, Mountain Lake, Montrose, Bible School park, Erieside, Stony Brook, Winona Lake, Northfield, etc. and shall do their utmost to this end. The work is entirely interdenominational in character, as will be the teaching staff, and so will make its appeal to the members of all evangelical churches throughout the territory.

### FERGUSON A CANDIDATE

Texas to Run for Presidency on American Party Ticket.

Ex-Governor James E. Ferguson of Texas in announced as a candidate for president of the United States on the American party ticket. He will oppose woman suffrage, the League of Nations, national prohibition and compulsory military training. He will recognize the right of laboring people to organize unions. He says he would reduce the federal income tax to one-fourth of what it is and would pardon Eugene Debs. The American party was organized in North Worth last year by Ferguson and his friends when they bolted at ex-Senator Joseph W. Bailey's political meeting.

### ROUND KNOB

The farmers are all very busy plowing and getting ready to plant. Mike Goworty and Albert Figard were in Bedford on Monday transacting business.

Mrs. William Tenley, Goldie Chane, Harry Winter and C. C. Foster visited at the home of Wade H. Figard on Sunday.

Cyril Hinich visited at the home of Raymond Figard on Sunday. Harvey Clark has purchased a saw mill and is saving for Wilbert E. Borton, who expects to build a new barn in the near future.

David Figard met with a very painful accident last week, having smashed one of his fingers while hauling coal.

The young folks held quite a surprise for Gladys Clark on last Wednesday evening, it being her sixteenth birthday. A large number of friends were present and the evening was spent playing games and pulling taffy. All departed at a late hour wishing Miss Clark many more happy birthdays.

The board of Road Commissioners met on Friday at Albert S. Figard's to transact their usual monthly business. All members present. They discussed their new method of road building.

Charley Wright, who has been in the hospital for some time suffering with a rifle shot wound which he received last December, is some better though he still has a lot of pain. We hope for his speedy recovery.

Mr. and Mrs. Roy Hinich and daughter aucted to Ray's Cove on Saturday where they spent Saturday and Sunday with Mr. John West, making the trip in their new Chevrolet.

Don't blame the theatrical producers who announce that tickets for new plays are scarce. Blame those who pay it.

Dr. Lodge's quick prescription calling for a separate peace with Germany will not suit the body of the American public. But this isn't his first reversal for he once declared there should be no separate peace.

The Postmaster at Purcell in behalf of the United States Government wishes to announce to the public that there is no whiskey hidden anywhere about the building, neither in it nor under it, and requests that they quit shifting the building about searching for it.

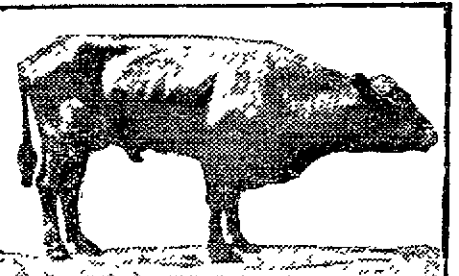

# FARM STOCK

## BEGIN FIGHT ON "T. B." NOW

Every Live Stock Owner Should  
Boost Campaign Inaugurated to  
Eradicate Tuberculosis.

(Prepared by the United States Department of Agriculture.)

Live stock owners are earnestly requested not to wait until the states and federal government come into their localities to eradicate tuberculosis. It would not be possible indeed, at this stage to undertake to eradicate tuberculosis from the live stock of the United States solely through organized official forces established by the respective states and the federal government. The area over which tuberculosis has spread is too vast; the herds too numerous, and funds are insufficient for conducting the work on so extensive a plan even though trained veterinarians were available in sufficient numbers to do the work. Every live-stock owner should be a party to this campaign which has been inaugurated to eradicate tuberculosis. In almost every locality of the United States are veterinarians capable of rendering valuable services to live-stock owners in this great work, and the cost of eradicating is greatly reduced by combating the disease in its early stages. Yet even in badly affected herds eradication can be undertaken with success. There are records of many herds, in which three-fourths

of the animals were affected with tuberculosis, which eventually were freed from it and afterwards maintained in a healthy condition.

## FISH BY-PRODUCTS FOR HOGS

Bureau of Animal Industry Is Making  
Tests of Material as Protein  
Feed for Swine.

Co-operating with the bureau of fisheries, the bureau of animal industry of the United States department of agriculture is making tests of fishery by-products as hog feed. For several years these bureaus have been studying the use of fish meal as a protein feed for swine and the product has been found equal to high-grade tankage, of which the supply is inadequate. During the last fiscal year a new product known as shrimp bran was studied. The result of tests with it as compared with fish meal were favorable, the remainder of the ration being shelled corn and middlings.

## PUREBRED HOGS PROFITABLE

At Least Twice as Much Should Be  
Realized From Breeding Stock  
as Those for Market.

Purebred hogs of any of the well known breeds are more profitable than grades. As at least twice as much should be realized from the sale of breeding stock as from market hogs. The purebreds also are generally better feeders than the grades. That is they will make better gains for the feed consumed.

## RIGHT AGE TO BREED GILTS

Some Breeders Wait Until Animal Is  
Fourteen Months Old—Aim for  
Two Litters Yearly.

Some breeders prefer not to breed a gilt until she is about fourteen months old, so that her first litter is produced when she is approximately eighteen months of age, and she is then bred to farrow every six months thereafter.

## THREE STOCK FUNDAMENTALS

Feeding, Breeding and Care Are Big  
Factors in Production of Ani-  
mals of Quality.

The three fundamentals in live-stock production are feeding, breeding and care, with a strong emphasis on feeding, because good feeding builds the animal and makes good records.

## DANGER IN STANDING WATER

Sheep and Cattle Should Be Kept  
Away From Stagnant Pool on  
Account of Disease Germs.

Standing water should never be allowed to remain where sheep and cattle can get free access to it, as it always has some kind of disease breeding germs in it, and results in the loss of stock occasionally.

### LESSON FOR MAY 9

ELI AND HIS SONS.

May be used with temperance application.  
LESSON TEXT—I Sam. 2:12; 27-36; 41-43.

**GOLDEN TEXT:** The wages of sin is death; but the gift of God is eternal life through Jesus Christ our Lord.—Rom. 6:23.  
**ADDITIONAL MATERIAL:**—I Sam. 2:22-26; 3:10-14; 4:13; 6:18; Eph. 6:1-4.  
**PRIMARY TOPIC:**—God Calls the Boy Samuel.

**JUNIOR TOPIC:**—Eli and His Sons.  
**INTERMEDIATE AND SENIOR TOPIC:**—Sowing and Reaping.  
**YOUNG PEOPLE AND ADULT TOPIC:**—A Responsibility of Parents and Children.

### 1. The Wickedness of Eli and His Sons 2:12-17, 27-36.

Eli's sons (vv. 12-17, 22). The behavior of these sons is in strange contrast to that of the boy Samuel. Eli's sons were priests and ministers in the things of the sanctuary, but "knew not the Lord" (v. 12).

(1) Graft (vv. 12-17). This greed was practiced upon the worshippers who brought their sacrifices to the sanctuary, according to God's law. God ordained that the priests should have the breasts and shoulders of the animals which were brought to the altar (Ex. 29:27; Lev. 7:31, 32). The degenerate sons of Eli were not content with this, but demanded more, and even sought to obtain it by force (v. 16). Moreover, they lifted out with a fork certain choice portions while raw, and had them roasted. Such behavior on the part of the priests was revolting to the worshippers and resulted in the abhorrence of the Lord's offerings.

(2) Eli (vv. 27-36). Eli was seemingly a good man, but he seriously erred before God in that he failed to discipline his sons (vv. 22-24). He knew of their sins and was conscious of his obligation, but his fatherly heart led him into a sentimental indulgence; his love got the better of his judgment. Eli was content with a weak remonstrance. He was under obligation not merely to speak against it, but should have acted against it.

(3) Eli and His Sons Punished (4:1-18). They at last came to reap what they had sown. God has appointed a day of judgment (Acts 17:31). There is a harvest time for the sinner as well as for the righteous (Joel 3:13). If one has sown to the wind he shall reap the whirlwind. The Philistines made war upon Israel and defeated them with great slaughter. This judgment had been made known to Eli by a "man of God" (2:27) and Samuel (3:11-18). The Philistines were instruments in the hands of God for this judgment.

(4) The battle with the Philistines (vv. 1-9). The Israelites made an unsuccessful attempt to free themselves from the oppression of the Philistines. Israel was smitten and some 4,000 were slain. This aroused them to inquire as to why the Lord had smitten them and to suggest that the ark be brought from Shiloh as a defense against the enemy. In this they committed two blunders: (1) The elders had no right to handle the ark; that belonged to the priests. Before taking such a step they should have sought the mind of God, and if it were his will that the ark be brought, it should have been done by the priests. (2) It was a superstitious use of the ark, which was a symbol of God's presence. They ignorantly assumed that the presence of God inhered in the symbol, forgetting that he is the living God, who has a will and purpose of his own, and therefore will not give countenance to that which disagrees with his holy purpose and will. Professing Christians in this age commit a similar error when they substitute the sacraments of the church for the presence of God in the soul. The earth rang out with a great shout when the ark was brought into the camp and the enemy was struck with fear, for they knew what wonders God had wrought in times past. In their desperation they made a stand, calling upon their men to do their best. With their backs to the wall they fought and won the victory.

(5) Israel's disastrous defeat (vv. 10-18). (1) The army was routed and a great slaughter occurred (v. 10); (2) the ark of God was taken (v. 10), the symbol of the divine presence with its sacred memories torn from their grasp and with it went Israel's hope; (3) Eli's sons slain (v. 10); the very priests who were the custodians of the ark were slain; (4) death of Eli the high priest (v. 18). The news of the defeat of the army and the death of his sons was awful, but when he heard that the ark of God was taken he died in haste.

**Best Means of Safety.**  
In all our weaknesses we have one element of strength if we recognize it. Here, as in other things, knowledge of danger is often the best means of safety.—E. P. Roe.

**The Bible.**  
The Bible never makes religion the mere embroidery of life.

**Compassion.**  
Compassion is an emotion of which we ought never to be ashamed.—Doctor Blair.

**Strong Women**  
 BY DR. VALENTINE MOTT.

Women and men too—  
 are just as strong and healthy as their blood. Vigor and health come with good blood. Without good red blood a woman has a weak heart and poor nerves.

In the spring is the best time to take stock of one's condition. If the blood is thin and watery, face pale or pimply, if one is tired and listless, generally weak, a Spring Tonic should be taken. An old-fashioned herbal remedy that was used by nearly everybody 50 years ago is still safe and sane because it contains no alcohol or narcotic. It is made of roots and herbs and called Dr. Pierce's Golden Medical Discovery. If druggists do not keep it in tablet form, send 60 cents for a vial to Dr. Pierce's Invalids' Hotel in Buffalo, N. Y.

**Turn To The Soil Again.**

To till the soil our fathers gained  
 Is grand and elevating.  
 To live a life that is not stained,  
 By helping dad while waiting.

If you wish to fill good daddy's place,  
 When he has said good by,  
 The old pipe you smoke is a disgrace,  
 To all the human eye.

Our fathers gained their lovely homes  
 By sweat and honest toil.  
 The time they spent was not to roam,  
 But tilling of the soil.

Dad saved his gains to give you books  
 And all your wants supply.  
 Now you have turned to have some crooks,  
 And all his laws defy.

The money earned by your own work  
 Is squandered with each day.  
 From honest toil you always shrink,  
 And hope to live on play.

Your father sighs when you depart,  
 From off his lovely farm.  
 He feels to sure of your wrong start,  
 He trembles with alarm.

The time will come for you and Fritz  
 To measure up your gain.  
 When that time comes, you'll see  
 Whose wits,  
 Come from a fertile brain.

Fritz stands upon his own threshold,  
 A smiling with delight.  
 A happy hand does his house hold,  
 While none are out of sight.

His wealth is all in richest lands,  
 And homes for all his kids.  
 While yours are scattered like the sands,  
 Poor toiling homeless kids!

We feel for you poor brainless boys,  
 And wonder what is wrong.  
 Your ways in life do sure annoy  
 The home where you belong.

A few more years will come and go,  
 And you will fathers be.  
 You can expect but little show,  
 From the dear old family tree.

On Fritz's land your sons will toil,  
 His slaves from day to day.  
 While they've no home of richest soil  
 And have but little say.

Just twenty years from now, my boys  
 You'll find my words are true.  
 The bowl is broke that held the joys,  
 And you will reap your dues.

## THE NAVY WAS READY.

From Admiral Sims' charges that at the beginning of the war the United States Navy was in a state of inefficiency and unpreparedness, Admiral Mayo and Admiral Rodman wholly dissent observes the New York World. Both are exceptionally qualified to give expert testimony. Both were on sea service during the war, while Admiral Sims was stationed at London in charge of operations abroad. Admiral Mayo was in command of the Atlantic Fleet, and Rodman commanded the squadron of battleships attached to the British North Sea Fleet.

Equally to the point is the answer of Admiral H. B. Wilson, Commander in Chief of the Atlantic Fleet, to Admiral Sims' criticisms of the Navy Department's conduct of the war. He declares that the active fleet never was better prepared for war than in April 1917, and that the Navy Department energetically cooperated with the Allies from the moment war was declared. The navy's accomplishments in the war, he says, "deserve the commendation of the nation, for they were so stupendous as to make relatively unimportant any mistakes."

Disagreement among experts is always to be expected. In the navy it is inevitable that they should divide into opposing camps whether on the subject of guns, armament, plans for new construction or general policy. It is unfortunate for Admiral Sims that in the controversy he has carried on so aggressively he should have found so little support among officers of high rank.

But after all, navy officers testifying before the Senate investigating committee have given their personal opinions. The main issue remains unchanged. As a proof of its efficiency the United States Navy conveyed nearly 2,000,000 troops to Europe without losing a man. In that fact the American people have reason to remember its service with pride, whatever mistakes of detail may have been made.

## CONGRESS HAS SORRY RECORD

Bent upon adjournment or recess early in June, the present Republican Congress will have written a sorry record. To date of general legislation promised the people in the 1918 campaign, it has passed a railroad bill granting that it will pass a budget law and soldier bonus bill prior to June, neither of which is yet certain. Its record will consist of three general pieces of legislation, added to the usual annual supply bills. It will have done nothing to adjust the tariff and revenue law inequalities; it will not have solved the problem of what to do with the merchant marine and will have done nothing to encourage foreign trade; it will have neglected its opportunity to create land settlements for discharged soldiers, and will have done nothing for the encouragement of better relations between capital and labor.

In a sentence, it will have done little but criticize the Administration for what it has done and for what it has tried to do, but has been unable to do because Congress blocked the way, and it has been in session approximately one year.

The people will hardly be fooled again by such promises as were made by the Republican leaders in the campaign of 1918.

E. W. Rothrock of Tyrone has secured enough Democratic signatures in Blair County to have his name placed on the Democratic primary ballot. His name was so certified by the Secretary of the Commonwealth to the County Commissioners this week. So his name will appear with Warren Worth Bailey.

Johnson, Borah, Kenyon and the other insurgents against "Old Guard" bosom are beginning to lodge protests against the reported selection of Senator Lodge for official "key-note" at the Chicago convention.

Shame is golden, but you can't always realize on it.

## LAUNDRY LORE

Strong soap—Hardens and shrinks woollens. Yellows white silks. Removes color in colored materials.

Rubbing—Wears all fabrics. Hardens woollens. Gives silk a rough and wavy look. Injures color.

Sunlight—Bleaches and whitens white cotton and linen material. Hardens and shrinks woollens. Yellows white silks and woollens. Fades color. Temperature—Sudden changes hardens and shrink woollens. Anything hotter than lukewarm injures silk and may change or remove color from any fabric.

## Bleaching Linen

Linen which has become an ugly shade owing to bad washing can be improved by bleaching. Soak the clothes for twenty-four hours in water in which a tablespoonful of borax to every gallon has been dissolved. Then wash them thoroughly in hot water. Wring out, place in the boiler cover with cold water, add a pound of soap cut in shreds to every four gallons, a handful of soda and a tablespoonful of cloudy ammonia or turpentine. Bring slowly to the boil and leave for fifteen minutes. Do not put too many things in at once, as the articles must have sufficient room to toss about. Turn them into a tub, cover them with the water in which they were boiled and leave them to cool. Wring the water slightly from them and spread in the sun or hang up to dry. Sprinkle from time to time with water as they dry. When a good color is obtained rinse in several tepid waters, blue them and dry again.

## Things to Remember

In cooking string beans, peas, and spinach, a grating of nutmeg much improves their flavor.

Shabby curtain rods and rings if enameled to match the woodwork of the room look as good as new.

By putting a little borax in your starch the clothes will iron easier and be stiffer.

If clothes are hung on the line neatly and smoothly much time will be saved when the time for ironing comes.

## Soap

Hard soap is made of one can of potash will soon become hot. Allow water, five and one-half pounds of clean grease, two tablespoonfuls of ammonia and one tablespoonful of borax. Put potash into saucepan with the cold water and stir slowly. The potash will soon become hot. Allow it to cool. Melt the grease until it becomes soft and warm. Pour the cold potash into the melted grease until it becomes thoroughly mixed and will drop the thickness of molasses. Add the borax and then the ammonia. It is now ready to be placed into boxes. When quite cold, cut into pieces.

## Rhubarb Shortcake

Steam a large bunch of rhubarb cut into small pieces, with a cup of sugar, and let it cool. Make a dough from two cups of flour, one teaspoonful of salt, two level tablespoonfuls of sugar, mixed with four tablespoonfuls of shortening and a cup of cold water. Put into a deep layer tin, and bake twenty minutes in a hot oven. Split and butter, then fill with the rhubarb. Pile the rest of the fruit on top and serve with powdered sugar.

## Against Labor Parties.

Pointing out that all of the federation's victories have been won without a party and that party ruin will spell disaster to future needs, Samuel Gompers president of the American Federation of Labor, reasserted the federation non-partisan political policies in an address here today.

He assailed independent labor parties that have sprung up and urged the federation membership to abide by its customary program of disregard of political parties and defeat all candidates who are enemies of American workmen.

Mr. Gompers branded the overall and the "eat cheap meat cuts" policy as an insult to American citizens. Impulsive, unwarranted and untimely strikes were denounced by Mr. Gompers, but he added that "no matter what law may be enacted the right to strike will never be driven from the earth." He referred as "the to the present switchmen's strike biggest blunder."

"The fact that men must remain at work before they can be heard, get redress or consideration, is an infringement on the rights of every citizen and in conflict with the thirteenth amendment," he said.

Fair minded Republicans admit as all of them know, that the cost-plus contract basis employed by the War Department during the war was the only way in which army camps could be constructed in time to meet the needs of the fast-growing army in the fall of 1917. As declared by Senator Sterling, Republican, in the Senate recently, it was the only way in which results could be produced quickly. Under the stress of war, the American people wanted quick results, and cared nothing about cost, so long as it meant the saving of the lives of American youths.

General Wood was colonel of the Rough Riders in Spanish War days, but Ill Johnson, and Bill Borah are of the opinion that he is now tractable enough to "stand hitched."

Something you never saw: A popular umpire.

House Republicans Propose Indirect Tax to Raise Money to Pay Soldier Bonus

Democratic members of the House Ways and Means Committee will propose to the House that the money necessary to pay a soldier bonus be raised through the imposition of a tax upon war profits.

Announcement by Republicans that the money would be raised through a tax of one-half of one per cent on sales, but that this tax would be so applied that the consumer would actually pay a tax of from 2 to 10 per cent and possibly in addition an added profit for the producers, brought the warning from Representative Henry T. Rainey, of Illinois, a Democratic Committee, that he would make a fight on the floor of the House for his plan to tax war profits.

Mr. Rainey says that no one will admit wishing to make money out of the war, but that the records show that 69,000 persons made three billions of dollars and that these 69,000 persons had an income of more than \$20,000 a year each prior to the war. He proposes that the Government take one-half of the profits above the \$20,000 made by these men during the war. In other words, if a man made \$30,000 during the war and \$20,000 prior to the war, Rainey would take one-half of the \$10,000, or \$5,000.

## Defy "Steering Committee."

Representative Rainey is assured the support of some Republicans who have fought for the bonus and who have defied the Republican "Steering Committee's" edict that there should not be a bonus.

The Republicans propose that a tax of one-half of one per cent shall be put upon each "turnover." For instance, they propose that when an umbrella is sold, a tax shall be paid by the purchaser equal to one-half of one per cent of the cost of the cloth when sold by the producer to the manufacturer. The steel ribs, when manufactured, would be taxed in like amount. The handle would be taxed and so on, and then eventually the tax again would be applied to the finished product. So that instead of paying one-half of one per cent, the consumer really would pay from 6 to 7 per cent.

The vicious feature about this tax is that it is another form of indirect taxation. The consumer would never know what the actual cost of production was, so the manufacturer could add the one-half of one per cent tax and then add extra profit to that, and so on down the line, so that the tax of 6 or 7 per cent not only would be passed along to the consumer, but in addition a profit for the manufacturer which would be equal to two or three times the tax. In other words the consumers not only would pay the one billion or more dollars to the soldiers, but might under the Republican proposal, pay another billion or more to profiteers who would be encouraged to take advantage of this indirect tax.

Several hundred rooms in Atlantic City hotels, costing \$10 or more each per day, were engaged for a big pep-up of Republican writers, motion picture men, artists, etc. There is curiosity to know whether the National Committee is paying the bill, or whether it will come out of some of the huge slush funds Senator Borah has been talking about.

## FREE EDUCATION IN FORESTRY.

A free education is offered the young men of Pennsylvania by the State Department of Forestry. Gifford Pinchot, the Chief Forester, today announced that competitive examinations will be held June 17 and 18, at Harrisburg, for free scholarship to the State Forest Academy at Mont Alto.

Following the examination, the twelve highest men will be appointed to the Forest Academy where they will begin their study of forestry next September. A further test of six weeks' work will be given on one of the State forests.

Young men between the ages of 18 and 25 who have completed a four year's High School course and who have had experience in farming, lumbering, surveying and other forms of outdoor work, are particularly desired. The scholarships provide free tuition, board room and laundry. Upon successful completion of the course, which includes thorough and practical training, a degree in forestry will be awarded.

Information about the State Forest Academy, and anticipation blanks for admittance to the examination, may be had by writing to E. A. Zeigler, Director, Pennsylvania State Forest Academy, Mont Alto, Pa.

## Boys are Boys

Many are the boys, that are weary today,

Tilling the lands of their dad.

They have now left home, to have their own way,

While telling of it is so sad.

Good old dad, with hair now silver and gray,

Is turning the wheel of his youth,

The babies he nourished and hoped would stay,

Are now in the towns running loose.

Oh daddy! the sweat you shed for your son,

Is now mingled with tears of grief.

When they tramped on your knee it was only fun,

While their kisses gave you relief.

A few more years and old dad will be free,

When the master calls for his lease,

The head of the home and old family tree,

With the burden of life and grief.

Then the home that he prized and loved so free,

Will pass to a son of a throne,

While Fritz is ready from over the sea,

To pay the good price without loan.

Fritz is happy in toiling on daily,

With such a good and noble will,

While he works the ground that's rich and shaley,

And loves his home upon the hill.

'Tis sad when our boys have no higher aims,

Than steering an old auto truck.

The calling they follow will serve to stain,

The crowning of life with good luck.

To drive a car is no higher calling,

Than the guiding a two horse team.

While Fritz is out on the farm a toiling,

Our boys on the streets are now seen.

## FOREST FIRE PROCLAMATION

WHEREAS, The native forests of Pennsylvania, with proper care and protection from fire, would have supplied by their recurring growth for generation after generation the need for wood of all our citizens; and

WHEREAS, The destruction of our unrivaled woodlands by the axe and fire has reduced not less than one-sixth of all the land within our Commonwealth, to barren and unproductive wastes; and

WHEREAS, Our people because of such destruction must import almost all their supplies of lumber from outside the State at heavy and unnecessary cost; and

WHEREAS, The cost and loss to our people, by reason of the fact that our denuded forest lands are prevented by fire from producing trees, include freight charges upon lumber imported into the State to an amount of not less than \$25,000,000 each year; the cost of the imported lumber itself to an amount of \$50,000,000 each year; the loss of the product of wood working industries now shut down or moved away; and the loss from floods, the loss to our farmers and merchants, and many other incidental costs, damages, and losses; and

WHEREAS, This tremendous yearly total, far in excess of the cost of our whole State Government, constituting one of the heaviest burdens our people are called upon to bear, could have been avoided by reasonable care and protection, and can still be reduced or removed by restoring the growth of our forests through the prevention of forest fires.

THEREFORE, I WILLIAM C. SPROUL, Governor of the Commonwealth, do call upon all the good citizens of Pennsylvania to exercise watchful care against the starting of forest fires and to extinguish the same promptly when by mischance they occur knowing that so to do is to perform one of the most important services than can be rendered to the present and future welfare of our State.

Let teachers impress upon our boys and girls this duty. Let ministers instruct their congregations. Let associations such as Boy Scouts, Granges, Labor Unions, Patriotic and Benevolent Societies, Chambers of Commerce and the like join in this crusade to protect ourselves and our posterity. If railroads take all steps needful to prevent or extinguish fires along their rights of way, let mines and factories see that no fires burn on or near their lands, and lumbermen leave no fire traps after logging. Let fishermen and all who use the woods for health or recreation see to it that their camp fires are kept safe, and that carelessness does not endanger the forest which they enjoy. Let all good citizens resolve to protect and restore to beauty and commercial prosperity our forest lands, now so largely desolate and unproductive, by preventing and suppressing forest fires and by giving information against those who criminally or thoughtlessly endanger our forests with fire and so detract from the comeliness and prosperity of our beloved Commonwealth.

GIVEN under my hand and the Great Seal of the State, at the City of Harrisburg this first day of April, in the year of our Lord one thousand nine hundred and twenty and of the Commonwealth the one hundred and forty-fourth.

By the Governor:  
WM. C. SPROUL,  
Cyrus E. Woods,  
Secretary of the Commonwealth.

THE UNIVERSAL CAR

Weak Links in a Strong Chain.

That's just what imitation parts are when they become a part of your Ford car. They look strong enough, but the metal isn't there — the strong, durable Vanadium steel that goes into the Ford chassis and every Ford part. Ford parts are specially cast and treated, each according to its use. Some require a hard, flint-like wearing surface, others need resiliency, and some need just "toughness".

Ford metallurgists have been studying those problems for sixteen years and know just how each unit should be made to endure a maximum of wear and tear. They know that best results can be obtained only by the use of special formulas for different parts, and that honest Ford parts wear from thirty five to one hundred per cent longer than counterfeits.

We carry complete assortments of Genuine Ford parts for both passenger cars and trucks. And our garages are equipped to give careful, prompt Ford service — from minor adjustments to complete overhauls. Drive in, it's better to be safe than sorry. Come to the Authorized Ford dealer for service.

The Postmaster at Beans Cove received an order from Washington that the cobwebs must be removed from the ceilings and walls at the postoffice this Spring. The Postmaster believes this order is due to a report from the last inspector who visited here and who seemed to be a sort of smart Elsie. However, he has decided if they want them removed they will have to come and see after the job themselves; that he saw nothing about this kind of work in his civil service examination.

Did you ever notice the photograph that is like you does not suit?

Senator Boies Penrose, "boss" of the Sixty-sixth Congress, is showing signs of renewed political activity. He has returned to his home in Philadelphia after a sojourn in Florida. On the way north, he began to talk, discussing President Wilson and Herbert Hoover.

Disposing of the Democrats in a sentence, Mr. Penrose turned to Mr. Hoover, the thorn that gnaws the Republican politician of the Penrose type to anger.

"Mr. Hoover had what a large number of people consider the impudence to state that Republicans should not participate in the discussions of the armistice and peace terms," said the Senator. "He has even said recently that he felt it his duty as an office holder to follow his chief, thereby apparently strengthening his position to be not the great international non-partisan administrator of trust funds, but, like the ordinary chair warmer holding an ordinary position, a partisan for political service."

One by one Ross Penrose will seek to kill off the Republican candidates for President until he comes to the particular aspirant he would put in the White House, and then he will bring all of his powerful influence to bear in behalf of the nomination of that candidate.

## FARM BOUNTY

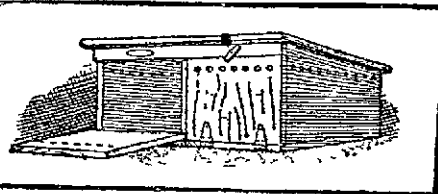

**BROOD COOPS FOR CHICKENS**  
Directions Given for Construction of Cheap and Effective Pens for Little Chicks.

The accompanying drawing gives an idea of how quickly and cheaply any number of brood compartment coops can be constructed. It shows only two sections, but any desired number can be put together, saving material. We suggest that only three at the most be united, as they are easier handled when desiring to remove to new quarters, says a writer in an exchange.

The one section shows the door closed and button turned to hold lid up at night. The other section shows the door down for daytime to allow the hen and young free range in the orchard or pasture, wherever the coops may be located.

A very convenient size both for cutting material and the handling of completed coop has been found to be as follows: Twenty-four inches high in front, 18 inches high at rear, 18 inches deep from front to back. One-inch holes can be bored at each end and a line of them through the top of the door, as indicated by the closed door in drawing. Also, if the roof boards are allowed to project over back wall several inches it is not a bad idea to bore a few holes in the back wall. Some farmers have been very thoughtful and constructed similar coops during the cold, wet, sleety weather the last winter when nothing in the field could be done, and they are ahead much when the fields demand so much time and attention at this season.

Shingles or prepared roofing, whatever is convenient, will make an ideal

Homemade Brooders.

covering for the roofs. We have seen where a farmer having a half dozen such constructed coops used galvanized iron from an old shed in town that he obtained for the hauling.

## AVOID HIGH-FLAVORED FEEDS

Onions Have Been Fed in Sufficient Quantities to Affect Eggs—Color of Yolk Influenced.

In extreme cases the flavor and odor of the feed have been imparted to the egg. Onions have been fed in sufficient quantity to bring about this effect. Those who desire to market a first-class article should not give feeds of high and objectionable flavor to their flocks.

In no case should tainted feed be allowed to enter the ration. Feed also has an influence on the color of the yolk, according to the United States department of agriculture. Corn fed exclusively will give a deep yellow or highly colored yolk, while wheat fed alone will produce a much lighter yolk. A fairly high-colored yolk is usually preferred and can usually be obtained by feeding a moderate amount of corn. Plenty of green feed also enriches the color of the yolk.

## DO NOT OVERCROWD POULTRY

Few Hens in Small Yard Do Better Than Larger Number in Same Space—Room for Each.

Better results will be obtained from a few hens in a small yard than from a larger number in the same yard. The backyard poultry flock rarely will consist of more than 20 to 25 hens, and in many cases only a half-dozen hens are kept. For a flock of 20 to 25 hens a space of not less than 25 by 30 feet is required. From 20 to 30 square feet per hen should usually be allowed.

## LARGE BREEDS GROW SLOWLY

Brahmas and Cochins Are Profitable Where There Is Demand for Heavy Fowls.

The biggest breeds of poultry, like Brahmas and Cochins, grow more slowly than the medium-sized breeds and therefore are not ready for market as soon, but they weigh more and are profitable where the market demands a large-sized fowl.

## NEEDED EXERCISE BY FOWLS

Hens Can Be Kept Busy by Scattering Grain in Litter on Dry and Clean Floor.

Be sure that the floor of the henhouse is dry and reasonably clean and covered with three or four inches of clean litter in which grain can be scattered so that the fowls can obtain exercise scratching for it.

# The Most Welcome Tire That Ever Came to Market

Men Who Appreciate Superlative Values Prefer The Brunswick

In every great tire factory, the  
chief question is: "How much can  
we give for the money?" And the  
product depends on the policy  
adopted.

Every man who has become ac-  
quainted with Brunswick Tires  
knows that Brunswick standards  
are again evident. This famous con-  
cern—noted as a leader in every  
line it entered since 1845—has once  
more proved that its policy is right.

A perfect tire is simply a matter  
of knowledge and standards and  
skill. No secrets nor patents pre-  
vent making an ideal tire.

But standards come first. For in  
tire making there is vast room for  
skimping, for subtle economies, for  
hidden shortcomings. Makers with-  
out the highest standards don't  
build high-grade tires.

The Brunswick organization of  
tire makers includes a brilliant staff  
of technical experts. Not a man

among them has spent less than  
20 years in handling rubber.

Each is a master of his craft.  
And the new ideas they bring to  
the attention of Brunswick direc-  
tors receive sincere consideration.

Every proved betterment is  
adopted unanimously.

The Brunswick Tire is a combi-  
nation of acknowledged features—  
plus Brunswick standards of manu-  
facture.

The result is a super-tire, the like  
of which you have never known be-  
fore. The kind of a tire you will  
gladly join in welcoming.

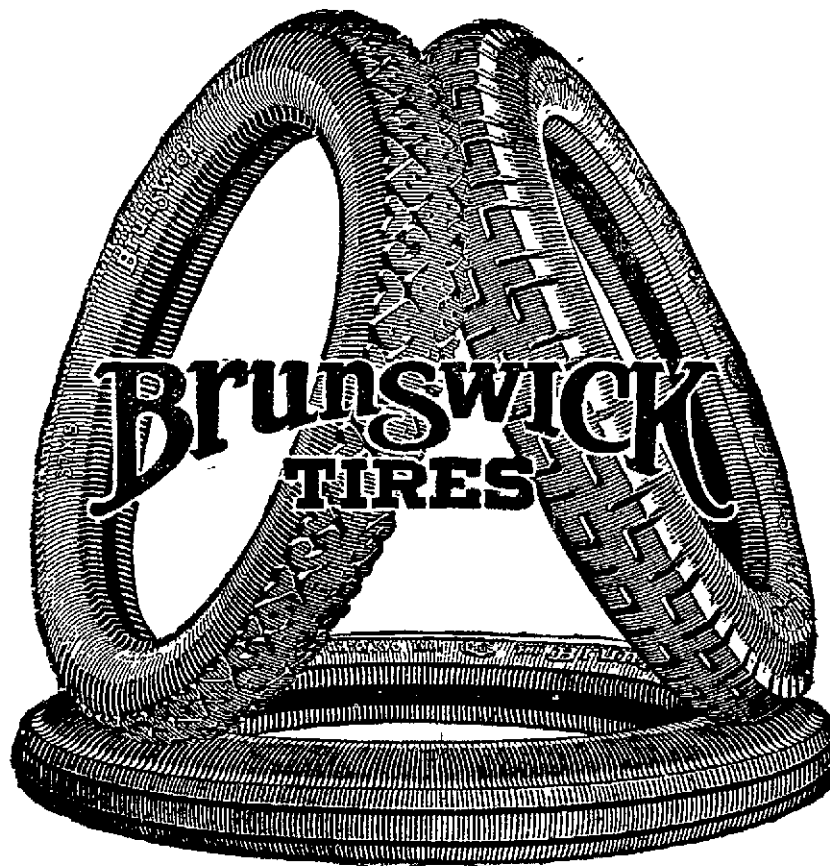

Yet Brunswicks cost no more  
than like-type tires.

Try ONE Brunswick. We prom-  
ise a surprise. And we feel certain  
that you will want ALL Brun-  
swicks.

Then good tires will have a new  
meaning to you.

## Gold Soaks Through Rock.

Not many years ago everyone be-  
lieved in the "marne" theory of gold.  
In other words, gold was originally  
deposited in reefs by the action of sea  
water, and the fine, placer gold, which  
is the cause of all big "gold rushes,"  
is simply gold reef washed into dust  
by weather and by water. The new-  
er idea is that mineralizing solutions—  
carrying up gold from the depths—  
have risen along the planes of least  
resistance, and that the gold has thus  
been deposited in the reefs and rocks  
where it is found. That gold does  
soak through rock is proved beyond  
doubt. In certain old mines in Aus-  
tralia which were abandoned many  
years ago and have since been re-  
opened, not only have the rock de-  
posits been found to be richer than  
they were thirty or forty years ago,  
but also the old beams and timbers  
have been found to be impregnated  
with gold.

## Known by Size of Jewelry.

Immense earrings are perhaps the  
most curious of all ornaments of the  
Maroo Lagoon tribes. Each tribesman  
tries to wear a bigger ring than his  
neighbor, for the larger the ring the  
greater is it looked upon as the high-  
est-prized mark of the greatest beauty  
and distinction. In fact, so great is  
the rivalry among the warriors of  
these tribes that many of the luckless  
natives have been known actually to  
tear the lobes of their ears clear  
through in their frenzied efforts to  
break all records for wearing the  
largest earrings.

## Expensive Immigrants.

Dangerous pests introduced from  
abroad are the Oriental peach moth,  
the Japanese beetle, the European ear-  
wig, the Leopard moth, the alfalfa  
weevil, the European eelworm, and the  
European corn borer. The latter is a  
pest which apparently was brought to  
the United States in a cargo of hemp  
unloaded at a rope factory near Bos-  
ton, Mass. It is exceedingly destruc-  
tive to corn, feeding by boring in the  
stalk. In its operation it works up-  
ward, eating out a chamber from the  
pith. The developing ears are also  
sometimes hollowed out. As high as  
90 per cent of the stalks in a corn  
field may be infested. Over 200 borers  
have been found in stalks growing in  
one hill of corn. Control is made more  
difficult by the fact that the borer feeds  
on a number of other plants, including  
the stalks of weeds and flowers, and  
may live over winter in grass roots.

## Statesmen Past and Present.

Compared with the statesmen of the  
eighteenth century we have more  
righteous men. Our petty scandals can  
never achieve their unparalleled ideal  
of corruption; our little license is but  
a drop in the ocean of their lawfulness.  
But those three-bottle men could rise  
to an occasion from their drinking, and  
fine issues touched them finely. Tre-  
velan's early history of Charles James  
Fox spares us nothing of the current  
depravity, yet leaves a sense of quality  
in public life which is lacking today.  
Giants of debauchery those statesmen  
often were, but still giants; and vul-  
garity is not of giants—From Nation,  
London.

**Light Not Necessary.**  
The curfew caused some amusing scenes in the early days of its application, but seldom anything so unusual as the incident I witnessed, or rather did not witness, says the clubman in Pall Mall Gazette. A small company had gathered to sample the art of a very remarkable male dancer from Spain. As often happens, the proceedings began unexpectedly late, with the result that they were interrupted by the lights being unceremoniously turned out. The Spaniard, however, explained to us that he was independent of lights, and he broke into a "zapateado," which is the remote Spanish equivalent of a Lancashire clog-dance. For variety of rhythm I have seldom heard anything like it and he was quite justified in saying that it could be appreciated in pitch darkness.

**Humor in a Dictionary.**  
Johnson's dictionary, says the latest writer on the life of Mr. Boswell's "illustrious friend," often expressed his personal prejudices and point of view. He enjoyed having a "dig" at Scotland, and so when he defined "oats" he wrote, "a grain which in England is generally given to horses, but in Scotland supports the people." In defining "lexicographer," he looked humorously at himself, and set down "a maker of dictionaries, a harmless drudge;" and Grub street he described as "the name of a street in London, much inhabited by writers of small histories, dictionaries and temporary poems." And his definition of "network" as "anything reticulated or decessated at equal distances, with interstices between the intersections," became famous as a definition needing more definitions to define it.—Christian Science Monitor.

**Flower Calendar.**  
At Grasse, a town in southern France, the seasons are marked by harvests of flowers, for this is the center of perfume making. In February and March violets and jonquils are the crop. In the summer months roses, orange blossoms and tuberoses fill the air with sweetness. In the autumn lavender is carried to the factories in baskets, on donkey backs and in wagons. All of these flowers are treated in much the same way. They are stuck into pure white fat, which draws out all of their perfume. This fat becomes the basis for most of the pomades and perfumes for which Paris is famous.

**Bury the Hatchet.**  
To "bury the hatchet"—not in somebody's head, as one of the season's comedienne cleverly put it—is to "let bygones be bygones," to forgive and forget an injury; in a word, to show that you have real sporting blood in the game of life. Wherefore, though, the expression about the hatchet? It is traceable to a custom formerly observed by the North American Indians. At the command of the "Great Spirit," they were obliged, when they took up the calumet, or the pipe of peace, to bury the weapons of war in the ground. And so at the peace "smoker," the tomahawks, scalping knives and war clubs were interred, signifying that all enmity was at an end.

**Where Pearls Abound.**  
On some of the islands lying to the north and east of Australia, inhabited by natives who still practice cannibalism, stories of valuable pearls are not infrequently found by daring white traders, even to this day. Natives often part with their collections of gems in exchange for mere trifles, particularly for things that they can use for personal adornment. In the New Hebrides the Solomon Islands and in some parts of the Fiji group pearls are still obtained in considerable quantities by natives. These divers perform wonderful feats. It is not unusual for them to bring up shells from a depth of 120 feet, and it is an ordinary thing for them to work in water 50 to 75 feet deep. They do this without diving equipment of any kind.

**When the Alabama Went Down.**  
In 1864, on the nineteenth of June, the battle between the U. S. S. Kearsarge and the Confederate cruiser Alabama took place outside the harbor of Cherbourg, France. The Alabama had been fitted out at Liverpool by agents of the Confederate government for the purpose of destroying the merchant ships of the Federal government. For two years she sailed the seas under command of Captain Semmes, destroying commerce. In June of 1864 the Alabama was lying in the harbor of Cherbourg and the Kearsarge, which had been pursuing her for more than a year, arrived outside the harbor and waited beyond the three-mile limit from the fourteenth to the nineteenth. On Sunday, the nineteenth, the Alabama came out and after a battle lasting two hours the Confederate sank without surrendering.

**Town of Historic Interest.**  
Brienne-le-Chateau, the little French town where Napoleon received his military education, recently celebrated the 105th anniversary of the emperor's last visit to the village. It was on January 29 that Napoleon began his campaign against the allies, who were storming at all the borders of France. At Brienne, where he had been taught the grim science of warfare, he attempted to cut the Silesian army in two by suddenly interposing his forces between those of Schwarzenberg and Blucher, the object being to prevent their uniting. Almost on the same spot and on the same day Napoleon had a hairbreadth escape from the attack of a Cossack who attempted to murder him. It was only the prompt assistance of Gorgaud that saved Napoleon.

**Irreversible Sand.**  
One of the most interesting and remarkable of the many regions for the observation of sand dunes lies between Bordeaux and Bayonne, in Gascony. The sea here throws every year upon the beach, along a line of 100 miles in length, some 5,000,000 cubic yards of sand. The prevailing westerly winds continue picking up the surface particles from the westward slope, where they are again deposited, and the entire ridge by this means alone moves gradually inward. In the course of years there has thus been formed a complex system of dunes, all approximately parallel with the coast and with one another and of all altitudes up to 250 feet. These are marching steadily inward at a rate of from three to six feet a year, whole villages having sometimes been torn down to prevent burial, and rebuilt at a distance.

**Two of a Name.**  
Two neighbors of a young couple who had been married but a few weeks were greatly surprised to hear unmistakable sounds of quarreling between them. "Charlie," the young wife was heard to say imperiously, "if you ever come into this house again and muddy my carpets with your feet, back home you go!" "That's serious!" said one neighbor to the other, and they proceeded to discuss the question whether the young pair could live together another week. The next day, however, a curly-haired black pup was seen playing on the lawn of the new householders. "Charlie," the young wife was saying to the new pet, "I'm sorry I scolded you last night, but your feet were terribly muddy!"

## DO YOU HAVE DIZZY SPELLS?

It's Important to Learn the Cause. As Many Bedford People Have

Dizziness is never a disease of itself—it's only a symptom of some deeper-seated trouble. Much dizziness is caused by disordered kidneys failing to filter all the poisons from the blood. These poisons attack the nerves and dizziness results. If you are subject to dizziness, there is good reason to suspect your kidneys, and if you suffer backache, headache, and irregularity of the kidney secretions, you have further proof. Many Bedford people have learned the value of Doan's Kidney Pills in just such cases. Read this Bedford resident's statement:

Mrs. S. Delancy, W. Penn St., says: "Every time I have had any trouble with my kidneys I have used Doan's Kidney Pills and they have relieved me in a short time. Frequently I have had bad pains in my back and severe headaches and I would get so dizzy that the room would seem to be going around. At such times just one box of Doan's have driven the trouble away and I consider them a wonderful remedy for kidney complaint."

**The Weakest Finger.**  
The finger on which the engagement and wedding rings are worn is anatomically the weaker of the ten. Planners have to give the third finger twice as much drill as the other. The explanation is that the tendon of the extensor muscle of the third finger is attached by a cross-slip to that of the second.

## To the Workingmen of our Country:

Do you realize that you are the people that Prohibition has hit? It has not touched the rich. They had the money to purchase an enormous supply. When this supply is exhausted they have the money and time to go to Cuba, Mexico, Canada, and Europe. Especially are Cuba and Canada securing Millions of American Dollars (The best money in the world) and our country is losing from four to eight million a day in Revenue.

It is you, Mr. Workingman, who must Produce to raise the revenue to keep this country going and a handfull of Prohibitionists are denying you the pleasure of having a glass of beer or wine when your day's work is done.

Let every true American and lover of Liberty protest against this obnoxious system that deprives you of your rights.

Our Good, Honorable, Thoughtful Forefathers made our Constitution which was then and still is the best in the world, guaranteeing to each and every one of us the right of "Life, Liberty and the Pursuit of Happiness."

On primary election day---Tuesday, May 18th. it is squarely up to you to go to the polls and vote your honest sentiment in this matter.

You stand by me and I will stand by you.

| The Horse Doctor reports that general health of all horses, mules, cows and goats as good, but says Alexander Wagner's condition is not at all favorable. | The Philosopher says speaking of slow fovers, the slowest he has ever seen is that which gets a man, or woman in early Spring and lasts till the next Spring. | Dan Hooks lost three fingers on his left hand yesterday while trying to see how old a mule's mouth was. Evidently the mule objected to telling his age. |
